RE: REQUEST FOR CONFIDENTIAL TREATMENT – *Connect America Fund*, WC Docket No. 10-90; *Lifeline and Link Up Reform and Modernization*, WC Docket No. 11-42

Request that Information Submitted to the Commission be Withheld from Public Inspection Pursuant to 47 CFR §.459 and 5 USC §552(b)(4): Five Year Service Quality Improvement Plan

Dear Ms. Dortch:

In accordance with the annual reporting requirements of 47 CFR §§54.313 and 54.422, Heartland Telecommunications Company of Iowa dba Enventis ("the Company"), Study Area Code 351096, is submitting a completed FCC Form 481 to the Commission via its Electronic Comment Filing System (ECFS) in WC Docket Nos. 10-90 and 11-42. The Company hereby requests confidential treatment of one attachment: The Five Year Service Quality Improvement Plan, which is redacted with this filing. The request for confidential treatment of the five-year plan is being made pursuant to section 0.459 of the Commission's rules and Exemption 4 of the Freedom of Information Act (FOIA). This attachment contains competitively sensitive data that the Company maintains as confidential and does not normally make available to the public. Release of this information would have a substantial negative impact on the Company.

The following information is provided in support of this request:

Identification of the specific information for which confidential treatment is sought:

Attachment to Line 112 of FCC Form 481 – Five Year Service Quality Improvement Plan. Specifically, confidential treatment is sought for all information in the five-year plan related to the Company's existing broadband capabilities and its network investment plans.

Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission:

The information was submitted in WC Docket Nos. 10-90 and 11-42 as an attachment to FCC form 481-the Carrier Annual Reporting Data Collection Form. Section 100 of FCC Form 481 requires incumbent local exchange carriers receiving high

cost support to attach a five-year service quality improvement plan, pursuant to 47 CFR §§54.202(a)(1)(ii) and 54.313(a)(1).

Explanation of the degree to which information is commercial or financial or contains a trade secret or is privileged:

The five-year service quality improvement plan contains granular information on the Company's existing broadband capabilities as well as detailed plans for financial investments in specific geographic areas of its network. This is closely-guarded, privileged information that the Company does not make publicly available.

CONCLUSION

For these reasons, pursuant to Sections 0.457 and 0.459 of the Commission's Rules, the Company requests that the portions of Form 481 which have been redacted with relation to Section 54.202(a) 5 - Year Service Quality Improvement Plan be treated as confidential under the Commission's rules and precedent and withheld in their entirety from public inspection, and that any distribution of them within the Commission should be limited to a "need to know" basis. In the event that any person or entity requests access to the documents or seeks to make any or all of them part of the public record, the company requests to be notified immediately so that it can oppose such request or take other action as necessary to safeguard its interests and the interests of consumers.

Respectfully Submitted,

TRADE SECRET DATA HAS BEEN REDACTED

Service Quality Improvement Proposal

Heartland Telecommunications Company of Iowa's ("the Company") serves the following exchanges in rural northwest Iowa: Akron, Bancroft, Boyden, Doon, Hawarden, Hull, Ireton, Lakota, Rock Rapids, Rock Valley and Sibley. Since 2001, pursuant to the Federal Communications Commission's Fourteenth Report and Order, Twenty-Second Order On Reconsideration, and Further Notice Of Proposed Rulemaking in CC Docket No. 96-45, and Report and Order in CC Docket No. 00-256, the Company has annually demonstrated to the Iowa Utilities Board that its use of the support has been only *"only for the provision, maintenance and upgrading of facilities and services for which the support is intended,"* consistent with section 254(e) of the Telecommunications Act of 1996.

As a recipient of relatively small amounts of high cost loop and other legacy Universal Service Fund support, the Company understood those monies were to support voice services only. In addition to initial expenditures reported, which were limited to voice, the Company has made significant investments in and deployed broadband via ADSL technologies to over [REDACTED] of the establishments in its service territory.

In the USF/ICC Transformation Order (Connect America Fund et al., Report and Order and Further Notice of Proposed Rulemaking, FCC 11-161 (rel. Nov. 18, 2011), the FCC expanded the list of supported services to include broadband, and ordered all rate of return carriers to develop a five-year plan under which they would respond to reasonable requests for broadband service. The Company has completed a thorough analysis of its study area for broadband expansion based on ADSL technology and its existing copper and fiber facilities. The Broadband Augmentation Plan ("BAP") submitted herein contains information at the wire center level concerning specific locations ("designated build areas") where the Company has determined it may need to respond to reasonable requests to provide service. This BAP is independent of the Company's annual plans for upgrading, maintaining and operating its network. Under the BAP, when requests for service are made that cannot immediately be filled, the requests are logged and reviewed on a monthly basis to determine if they are located

within one of these designated build areas. Because the FCC has offered guidance that end user revenues can be considered when evaluating reasonable requests, (Report and Order, Declaratory Ruling, Order, Memorandum Opinion and Order, Seventh Order on Reconsideration, and Further Notice Of Proposed Rulemaking, FCC 14-54, Para. 65, June 11, 2014), if request levels reach a threshold level of [REDACTED] of a Carrier Serving Area (CSA), the company plans to poll the building/home owners to determine if they would be likely to subscribe to service if it was available. When polling results reflect the Company's current average adoption rate of [REDACTED], then the Company will incorporate that area into its plans for construction of facilities to provide broadband, weather and budgets permitting. This evaluation will also depend on revenues from federal universal service funding being available at currently-projected levels. The Company expects that the investments detailed below will increase broadband availability in its territory to approximately [REDACTED]

The cost estimates, locations and investment levels included in this Broadband Augmentation Plan are "forward-looking" projections. Such forward-looking projections are based on current expectations, estimates, uniform consumer demand and projections about the industry in which the Company operates. As a result of uncertainties in the forward-looking projections, the Company reserves the opportunity to modify its Plan in response to regulatory decisions, consumer demand, technological advancements and other considerations as they become known. This submission is not a guarantee of future performance and actual outcomes and results may differ materially from what is expressed or forecasted in this forward-looking projection. All material adjustments to the Plan will be reflected and explained in subsequent Form 481 submissions.
